

Kenzo MORENO CARPIO

Computer Engineer – Cybersecurity, Systems and Networks

Available immediately

Personal Profile

Graduate of an **engineering school** in **computer science** with a specialization in **cybersecurity**, currently seeking a **first professional position** in this field.

I also write **articles** about cybersecurity and am preparing the **CPTS** certification.

Skills

Cyber: Web / AWS Pentesting, AD Pentest basics, Audits, SOC Risk analysis, Reversing

Networks: TCP/IP, IPv4/IPv6, Routing, HTTP(S), DNS, MITM

Systems: Linux administration & Active Directory, Virtualization

Tools: Git, Linux, ELK, Docker, AWS, Burp Suite, Metasploit

Languages: Python, C, C++, SQL, JavaScript, Java, HTML, Bash

Soft Skills

Teamwork, SCRUM processes, Transparency, Rigor, Curiosity

Languages

French	Native language
English	C1 (7/9 IELTS)
Spanish	A2

Interests

Cybersecurity / Cinema
Computer Science / Guitar
Painting & Scale Modeling
Strength Training

PROFESSIONAL EXPERIENCE

2025 Penetration Testing and Audit Internship at Orasys

ORASYS (91120 PALAISEAU) · FRANCE 📍

Six-month final-year project.

Participation in **Web pentesting** missions, writing a **AWS pentesting methodology** and creating a **mind map**.

Focus: AWS, IAM, injections, JWT, Burp Suite, bruteforce, HTTP requests, cryptographic primitives, Metasploit.

2024 Internship at the University of Pretoria

UNIVERSITY OF PRETORIA · SOUTH AFRICA 📍

Collection, preservation of integrity and **analysis** of 5G network data in a virtualized environment (NFV).

Java development for ingestion and transmission of **JSON** packets.

Storage and querying in a **SQL** database using Adminer.

Focus: Java, multithreading, SQL, SCRUM, modular design.

PROJECTS

Winter
2024-25

"DNS Spoofing" Project: Development of a DNS attack tool (Man-In-The-Middle) for educational and ethical purposes. Automatic generation of fake websites, interception and selective response to DNS queries using multithreaded Python, ARP spoofing, HTTPS certificate generation.

Focus: Red Team, DNS, MITM, Packet Manipulation, Automation, HTTP(S).

Winter
2024-25

"La Grenouille" CTF: Creation of an educational CTF challenge aimed at introducing beginners to pentesting techniques (web, logic and authentication). Deployment using Docker, development in PHP.

Focus: CTF, Web Development, Web Security, XSS, SQL, Bash.

Spring
2024

P2P File Transfer Application: Development of a client, server and tracker in Java and C. Design of a network protocol, file exchange testing, robustness and reproducibility. Teamwork on protocol design and software engineering.

Spring
2024

User-level Thread Library: Development in C of a library handling thread creation, synchronization and scheduling, with an interface inspired by pthread. Performance testing.

EDUCATION

2022
2025

Engineering Degree in Computer Science & Cybersecurity Bordeaux-INP - ENSEIRB-MATMECA

ENSEIRB-MATMECA · Bordeaux (FRANCE) 📍

Computer Science curriculum specialized in **cybersecurity, systems and networks**, including **courses and projects**. Program accredited **SecNumEdu** by **ANSSI**.

2019
2022

Intensive Physics & Engineering sciences course

JACQUES DECOUR · Paris 75009 (FRANCE) 📍

Preparation for competitive engineering school entrance exams.

Intensive program in mathematics, physics and engineering sciences.

ACTIVITIES AND INVOLVEMENT

Winter
2024-25

Hack-it-N Volunteer: Welcoming and guiding visitors, booth setup, conference attendance, CTF presentations.

10/2024

Star Hack: Participation in the Cyber Campus Nouvelle-Aquitaine CTF.
